# about me

I'm a restless mind where numbers and emotions converge, where precise logic meets artistic drive. My academic background in Mathematics and Data Science naturally intertwines with my vibrant passion for fashion, a space where I truly find my creative voice. Currently, I am nurturing a personal brand project in urban fashion, shaping its identity, narrative, and unique discourse.

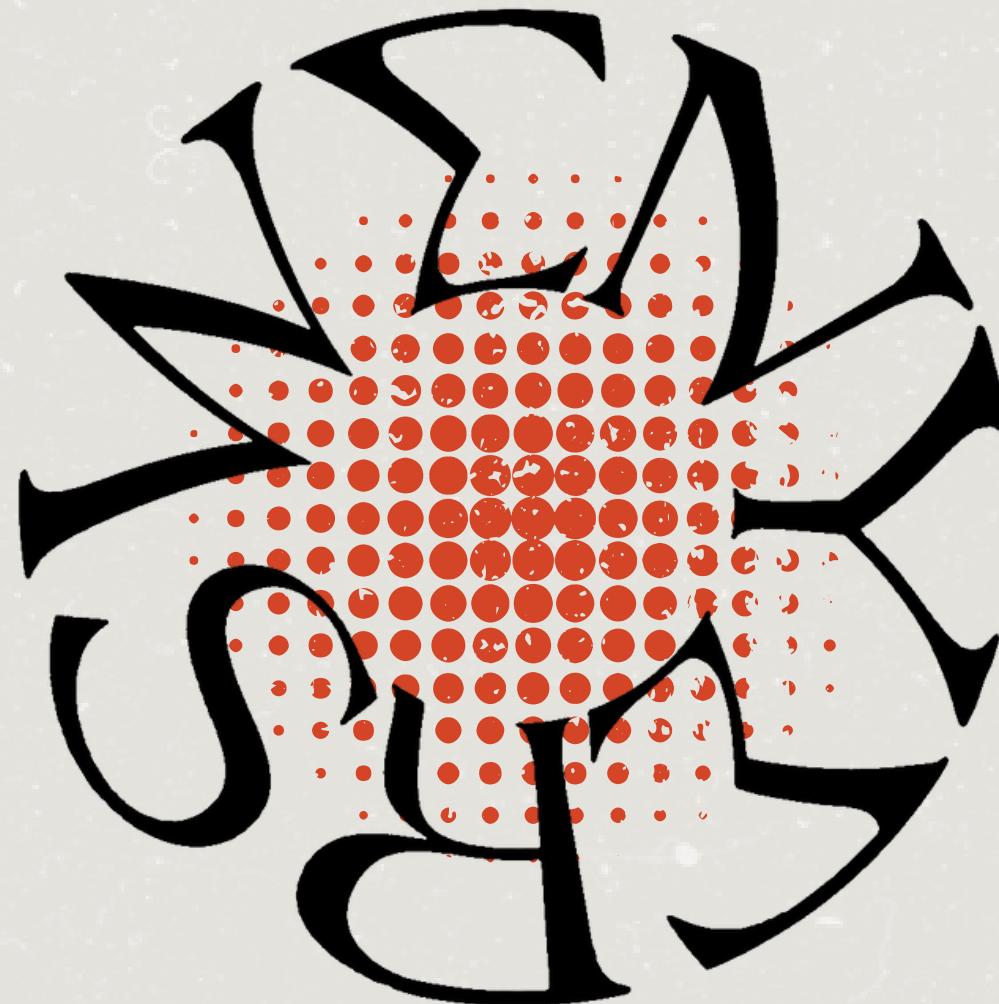

# origins

My creative journey began at an early age, sewing alongside my grandmother during countless afternoons spent experimenting with fabrics, textures, and shapes. These intimate moments instilled in me the values of craftsmanship, authenticity, and emotional storytelling through garments.

"Wenyers" is a deeply personal and creative project inspired by my artistic identity, Ura Wenyers—a fusion derived from my own name, Laura (La-Ura), symbolizing my evolution into a creative force reminiscent of legendary fashion icons such as Coco Chanel, Donatella Versace, Christian Dior, or even Elsa Schiaparelli.

brand

Wenyers represents my artistic vision and commitment to creating timeless yet innovative fashion pieces that express individuality, confidence, and authenticity. Each garment carries a narrative that blends tradition and modernity, craftsmanship and technology, carefully reflecting my personal journey and the stories of those who wear them.

# vision

To create meaningful fashion that inspires individuality and encourages responsible consumption, blending technology with traditional craftsmanship to redefine urban style.

# mission

To craft unique, ethically-produced pieces that tell authentic stories, promote diversity, and resonate emotionally with wearers, fostering a community around shared values and sustainable living.

Advanced Diploma in Fashion Design    European University of Madrid | IADE    2025-2027

Master's in Big Data, Data Science  
and Artificial Intelligence    Complutense University of Madrid    2024-2025

Erasmus + Program  
(Bachelor's in Mathematics)    University of Zielona Góra, Polonia    2023-2024

Bachelor's Degree in Mathematics    University of Extremadura    2019-2024

*Languages*  
Spanish    Native

English    B2  
(Cambridge)

French    B1  
(DELF - EOI)

I consider myself a multidisciplinary creative person where analytical precision meets artistic exploration.  
My goal is to create a distinctive voice at the intersection of innovation, sustainability, and style.

# Academic background

## Technical Experience

Master's Thesis (TFM) in research on pictorial authorship authentication with explainable AI

Madrid  
September  
2025

Internship at Correos (Madrid)  
Process Automation and Artificial Intelligence

Madrid  
February - August  
2025

Winner of the Tirme Challenge  
II Circular Innovation Hackathon

Palma de Mallorca  
November  
2024

Bachelor's Thesis (TFG) in Mathematics on emotion classification through deep learning

Zielona Góra  
July  
2024

Member of the Organizing Committee of the XXIV National Meeting of Mathematics Students

Badajoz  
July  
2023

## Creative Experience

Collaboration with the brand Balteus (2025): Participated in the design of a modular belt buckle collection, exploring both aesthetic and functional solutions in the field of fashion accessories.

Handmade creation of original and experimental garments since adolescence.

Basic proficiency in creative digital tools such as Adobe Photoshop and Illustrator, applied to design and conceptual development.

Training in theatre (2016–2019) and elementary music (piano, 2006–2013), bringing artistic sensitivity and narrative skills to creative projects.
